ABSTRACT

This report is part of an annual national survey that examines salaries of full-time teaching faculty in 54 selected disciplines. Data for the study as a whole were collected from 305 public and 403 private institutions for the baseline year of 1997-1998 and the trend year of 1999-2000. This portion of the study covers salary data for faculty in Business Management and Administrative Services at 95 public and 68 private institutions for 2000-2001, with a comparable number for 1997-1998. Data are presented for average salaries by faculty rank, "faculty mix percent" (percentage of faculty at each rank), and "salary factors" (ratio of the average salary in the discipline to the total institution average). Salary trend information is compared for public and private institutions for each of the two study periods with trend information for all fields and with the Consumer Price Index. The study found that for the 2000-2001 period the average salary of $68,885 for 1,327 of faculty in public institutions was 21.5% higher than the average salary for all faculty in all major fields. The average salary increase was 0.9% per year for public institutions and 2.2% per year for private institutions above the cost of living as measured by the Consumer Price Index. Appendixes contain a list of the selected academic disciplines and lists of public and private institutions participating in both studies. (SLD)

Since 1982-83 the College and University Professional Association for Human Resources (CUPA-HR) in Washington, D.C., in cooperation with Appalachian State University in Boone, NC, have conducted annual national faculty salary surveys by discipline and rank each year through 2000-01. Two separate surveys are conducted each year, one for public senior colleges and universities and the other for private senior colleges and universities.

Salary data from the 1997-98 and 2000-01 surveys were collected and tabulated for full-time teaching faculty in 54 selected academic disciplines/major fields chosen from among those defined by A Classification of Instructional Programs, 1990.

Each of the 54 academic disciplines/major fields presents a summary of the overall average salary increase in that academic discipline/major field from the "baseline year" of 1997-98 to, and including, the "trend year" of 2000-01 for both public and private participating institutions. Of the 371 public institutions which participated in CUPA-HR's public survey of 1997-98, 305 also participated in the 2000-01 survey. Data from those same 305 institutions were used in both the baseline year and the trend year studies. Of the 543 institutions which participated in CUPA-HR's private survey of 1997-98, 403 also participated in the 2000-01 survey. Data from those same 403 institutions were used in both the baseline year and the trend year studies.

In addition to listing the average salaries in **Business Management and Administrative Services** for both public and private participating institutions by rank, including "new assistant professor," and listing the faculty mix percentage (FAC MIX PCT) and the salary factor, comparisons are made between the two public surveys and the two private surveys for each of the two study years (1997-98 and 2000-01) and with the CPI (Consumer Price Index) of changes in the cost-of-living.

The list of all 54 selected academic disciplines/major fields surveyed, including **Business Management and Administrative Services**, is found in Appendix A, and the list of all participating senior colleges and universities are found in Appendix B (public) and C (private) of this article.

SALARY-TREND STUDY OF FACULTY IN BUSINESS MANAGEMENT AND ADMINISTRATIVE SERVICES FOR THE YEARS 1997-98 AND 2000-01

by
Richard D. Howe

Since 1982-83 the College and University Professional Association for Human Resources (CUPA-HR) in Washington, D.C., in cooperation with Appalachian State University in Boone, North Carolina, has conducted two annual national faculty salary studies by discipline and rank through 2000-01: one for public senior colleges and universities, and the other for private senior colleges and universities.

Salary data for each study were collected and tabulated for full-time teaching faculty in 54 selected academic disciplines/major fields chosen from among those defined by A Classification of Instructional Programs *(CIP), 1990, including Business Management and Administrative Services. The CIP defines the discipline/major field of Business Management and Administrative Services as,

> A summary of groups of instructional programs that prepares individuals to perform managerial, research, and technical support functions related to the commercial and/or nonprofit production, buying, and selling of goods and services.*
>
> [*A Classification of Instructional Programs (Washington, D.C.: National Center for Education Statistics, [1990]. P. 187--52.0000).]

This article summarizes the overall average salary increases in the discipline/major field of Business Management and Administrative Services for both public and private institutions from the "baseline year" of 1997-98 to and including the "trend year" of 2000-01. Of the 371 institutions which participated in CUPA-HR's PUBLIC study of 1997-98, 305 also participated in 2000-01. Data from those same 305 institutions were used in both the baseline year and the trend year. Of the 543

institutions which participated in CUPA-HR's PRIVATE study of 1997-98, 403 also participated in 2000-01. Data from those same 403 institutions were used in both the baseline year and the trend year.

This article lists the average salaries for the discipline/major field of Business Management and Administrative Services for both public and private participating institutions by rank, including NEW ASST PROF (new assistant professor), the FAC MIX PCT (faculty mix percentage), and the SALARY FACTOR. Comparisons are also made using the CPI's (Consumer Price Index) changes in cost-of-living between the two studies for each of the two study years (1998-99 and 2000-01).

The CPI uses a base period of 1982-84 and measures/tabulates prices of food, clothing, shelter and fuels, transportation, medical care, entertainment and other goods and services people buy for day-to-day living. When examining trends in faculty salary, it is important to consider any changes in the purchasing power of salaries due to inflation. Comparing changes in the faculty salaries with the CPI gives one a more precise view of what "real" salary increases are, that is, buying power.

The salary is based on a nine- or 10-month academic year salary of full-time faculty, and does not include any faculty teaching less than 51 percent. Salary for summer academic work, fringe benefits, and perquisites are also not included in the salary data. The average salary is based on the study information with the assumption that all employees are full-time. The average salary displayed is an average of all faculty salaries reported for a given rank and discipline.

"NUM" refers to the number of faculty members whose salaries were included to compute the average salary.

"N/IN" refers to the number of institutions that reported salary data for a given academic rank and discipline/major field.

The FAC MIX PCT represents the percentage of faculty in a given discipline/major field who hold a given academic rank. For example, a FAC MIX PCT factor of 35.2 for associate professors of Business Management and Administrative Services in the 1997-98 public study means that 35.2 percent of the faculty in that discipline/major field held the rank of associate professor.

The SALARY FACTOR for a given rank in a given discipline/major field represents the ratio of the average salary to the total average salary of all institutions in each of the four studies: PUBLIC 1997-98, PUBLIC 2000-01, PRIVATE 1997-98 and PRIVATE 2000-01. For example, a SALARY FACTOR of 1.20 for associate professors in the discipline/major field of Business Management and Administrative Services in the 1997-98 public study means that their average salary is 20 percent higher than the average salary for all associate professors in all institutions in that study.

NEW ASST PROF refers to the grouping of assistant professors hired for the first time in the fall of the study year (1997-98 or 2000-01). All information for this group was included in the ASST PROF group for reporting purposes.

ALL MAJOR FIELDS refers to the entire data base for all 54 disciplines/major fields in each of the four studies. Among other things, it is used to compare the discipline/major field of Business Management and Administrative Services with the entire data base for each study.

The reader will find the size of the sample on which each percentage or dollar value is based to be of particular importance. The smaller the number in the group, the greater the effect of extreme scores on a descriptive statistic such as the average. It should also be noted that any large disparity in the sample sizes between the "baseline year" of 1997-98 and the "trend year" of 2000-01 will lessen the reliability and validity of any conclusions that one might make based on a simple comparison of averages.

RESULTS OF THE TWO PUBLIC STUDIES: 1997-98 AND 2000-01

In the PUBLIC 1997-98 study in the above table, the discipline/major field of Business Management and Administrative Services was reported in 96 of the 305 public institutions. The average salary of the 1,461 faculty was $62,473. This average salary was approximately 20.2 percent higher than the average salary of $51,971 for all 94,917 faculty in ALL MAJOR FIELDS in the same 1997-98 public study.

For the PUBLIC 2000-01 salary study in the above table, Business Management and Administrative Services was reported in 95 of the same 305 public institutions. The average salary of the 1,327 faculty was $68,885. This average salary was approximately 21.5 percent higher than the average salary of $56,712 for all 86,307 faculty in ALL MAJOR FIELDS in the 2000-01 public study.

The three-year increase in average salaries for all faculty in the discipline/major field of Business Management and Administrative Services in the public institutions studied was 10.3 percent ($68,885 minus $62,473 equals $6,412). The CPI of increase cost-of-living between October 1997 and October 2000 was 7.7 percent. In comparison, with the CPI, there was a relative increase in Business Management and Administrative Services average faculty salaries over the three-year period by 2.6 percent or an average of 0.9 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS over three years in the public institutions studied was 9.1 percent ($56,712 minus $51,971 equals $4,741). In comparison to the discipline/major field of Business Management and Administrative Services (10.3%), the faculty in ALL MAJOR FIELDS received a relative increase in their salaries of 1.2 percent less than the faculty in the discipline/major field of Business Management and Administrative Services.

In the 1997-98 study the faculty mix percentage in Business Management and Administrative Services is higher at the professor rank than at the assistant professor rank: 35.3 percent vs. 23.7 percent; in the 2000-01 study it is 33.5 percent vs. 25.8 percent. The differences in faculty mix percentage at the ranks of professor and assistant professors in ALL MAJOR FIELDS for both public studies are 35.4 percent vs. 28.0 percent (1997-98) and 33.8 percent vs. 29.3 percent (2000-01).

Finally, the hiring rate of new assistant professors in Business Management and Administrative Services in the public studies was higher than the hiring rate of ALL MAJOR FIELDS in 1997-98, 4.9 percent (72/1,461) vs 4.7 percent (4,477/94,917) and lower in 2000-01, 5.2 percent (69/1,327) vs. 5.3 percent (4,595/86,307).

RESULTS OF THE TWO PRIVATE STUDIES: 1997-98 AND 2000-01

The PRIVATE 1997-98 salary study in the above table indicates that the discipline/major field of Business Management and Administrative Services was reported in 57 of the 403 private institutions. The average salary of the 575 faculty was $61,034, an average salary 21.9 percent higher than the average salary of $50,060 for all 43,743 faculty in ALL MAJOR FIELDS in the 1997-98 private study.

In the PRIVATE 2000-01 salary study in the above table, 68 of the same 403 private institutions reported Business Management and Administrative Services. The average salary of the 670 faculty was $69,749, an average salary 23.7 percent higher than the average salary of $56,401 for all 42,767 faculty in ALL MAJOR FIELDS in the 2000-01 private study.

The three-year increase in average salaries for all faculty in Business Management and Administrative Services in the private institutions studied was 14.3 percent ($69,749 minus $61,034

equals $8,715). The CPI increased cost-of-living between October 1997 and October 2000 was 7.7 percent. A more realistic increase, therefore, in the average faculty salaries of Business Management and Administrative Services over the three-year time period, is 6.6 percent or 2.2 percent each year above the cost-of-living.

The three-year increase in average salaries for all faculty in ALL MAJOR FIELDS in theprivate institutions studied was 12.7 percent ($56,401 minus $50,060 equals $6,341). In comparison to Business Management and Administrative Services (14.3%), the faculty in ALL MAJOR FIELDS increased their salaries 1.6 percent less than faculty in Business Management and Administrative Services.

For the 1997-98 study in the discipline/major field of Business Management and Administrative Services, the faculty mix percentage is higher at the professor rank in comparison to the assistant professor rank: 30.3 percent vs. 26.6 percent (1997-98); and 33.1 percent vs 28.4 percent, (2000-01). The differences in the ranks of professor and assistant professor in ALL MAJOR FIELDS for both private studies are 32.3 percent vs. 30.7 percent (1997-98) and 32.2 percent vs. 31.3 percent (2000-01).

Finally, the hiring rate for new assistant professors in Business Management and Administrative Services was lower than the hiring rate in ALL MAJOR FIELDS in the 1997-98 private study: 4.9 percent (28/575) vs. 5.1 percent (2,246/43,743) and virtually the same in the 2000-01 private study: 5.5 percent (37/670) vs. 5.5 percent (2,348/42,767).

CONCLUSION

This article presents salary-trend information on the academic discipline/major field of Business Management and Administrative Services and compares that information with both ALL

MAJOR FIELDS and the CPI over a period of three years, from the "baseline year" of 1997-98 through the "trend year" of 2000-01. Two studies--one for public institutions, and the other for private institutions--were conducted for the baseline year and for the trend year--a total of four studies. A total of 4,033 (1.5%) faculty in the discipline/major field of Business Management and Administrative Services participated and were included in the 54 disciplines/major fields in each ofthe four studies and in the overall total of 267,734 participating faculty. The same 305 public institutions and the same 403 private institutions in the United States participated in the baseline year and in the trend year.

Although the public and private studies data may be interpreted in a variety of ways, several significant points are as follows. First, the average faculty salary factors in the discipline/major field of Business Management and Administrative Services for the 1996-97 public study was 20.2 percent higher than that of all ranks in ALL MAJOR FIELDS (1.00); and for the 1997-98 private study it was 21.9 percent higher than the average faculty salary factors for all ranks in ALL MAJOR FIELDS (1.00). In both the public and private studies the average faculty salary factors for all ranks in Business Management and Administrative Services in 2000-01 were 21.5 percent higher and 23.7 percent higher than the average salary factors for all ranks in ALL MAJOR FIELDS (1.00), respectively.

Second, the October 2000 CPI reflects an 7.7 percent increase over the October 1997 CPI and indicates that the faculty in Business Management and Administrative Services in the public institutions received an average annual salary increase of 0.9 percent above the cost-of-living. In the private institutions the annual average salary increase was 2.2 percent above the cost-of-living.

Third, in both the 1997-98 and 2000-01 public studies and in the 1997-98 and 2000-01 private

studies in Business Management and Administrative Services, the professor rank FAC MIX PCTs are higher than those for the assistant professor rank.

Finally, the hiring rate of new assistant professors in Business Management and Administrative Services in the 1997-98 public study is higher than that of ALL MAJOR FIELDS; and in the 2000-01 public study and the 1997-98 private study, the hiring rates were lower than the hiring rate of ALL MAJOR FIELDS; while in the 2000-01 private study the hiring rates were virtually the same.

Because a significant data base of average faculty salaries in the academic discipline/major field of Business Management and Administrative Services has now been developed, it is anticipated that this information will serve as a valuable reference and evaluation tool for interested administrators and professors.

Richard D. Howe is the originator and director of the annual CUPA-HR faculty salary studies. He is a professor of leadership and educational studies at Appalachian State University, Boone, North Carolina.
